

DA SERIES AERATOR

BUILT FOR RESULTS OVERBUILT TO LAST

The ultimate implement option for every operation, the RanchWorx DA Series Tandem Aerator is designed to take on any job you throw at it. From aerating and renovating pastures in its new parallel drum setting, to clearing brush and cultivating crops with its multiple offset positions, this implement has what it takes. The most cost-effective control of brush species in one pass. Easily rejuvenate decadent grass stands. This series will allow you to maximize the production for every acre in your operation.

The RanchWorx DA Series has a variety of customizations available. An adjustable drawbar allows for pulling of other implements behind the aerator. A broadcast or drop seeder package means perfect seed dispersion behind the aerator to take advantage of the newly opened soils.

Because our uncompromised quality extends throughout the RanchWorx product lines, little maintenance is needed to keep each aerator working for generations to come.

THE RANCHTECH® BLADE ADVANTAGE

The new RanchTech® blades have a beveled and tapered edge that sharpens with use. This new forged alloy gives the blades a **35,000+ acre** lifespan.

The RanchWorx® Advantage comes from the wide sharp blades and spiral design. This design allows for the weight of the unit to cut, not tear, the root system. Since the blades are truly no-till, the plants will respond quickly and favorably.

RanchTech® Blades, combined with a RanchWorx® signature aerator, will allow every molecule of water to be absorbed and utilized by the plant. Fertilization and irrigation applications will notice accurate and effective absorption as the material makes its way deeper into the soil for immediate intake by the plants roots.

**THERE IS NO BETTER WAY TO AERATE
THAN WITH RANCHTECH® BLADES**

LIFETIME WARRANTY

AGAINST BREAKAGE ON RANCHTECH® BLADES
